➤ **Introduction:**

We intend to develop a multipurpose web solution, named FREN

➤ **Problem statement:**

A multipurpose app inspired by Wechat which enables a user to use it as a digital wallet, make and receive online payments, buy general commodities, pay utilities and collaborate with other banking systems as well so that it may become easier for the user to use the application and fulfill his/her needs.

➤ **TOOLS & TECHNIQUES:**

ReactJs for frontend

NodeJs for backend

(Use of technology stack may vary depending upon circumstances)
